

MSEP – Environmental Policy Statement

Abbey Business Interiors Limited have been providing workplace fit out and furnishing services to some of the best known UK businesses for over 30 years. We specialise in providing full project management services to our clients from a range of industries, to ensure that their internal spaces are safe and enjoyable environments for their employees and customers.

One of the company's main goals is to reduce our impact on the environment, and to protect the environment wherever possible. Commitment to the implementation of supporting managerial and business operational systems is essential to realising that goal.

We aim to provide a high quality and efficient service to our customers, and are committed to this, whilst also minimising the company's effect on the environment.

Throughout our business activities we will endeavour to meet our environmental objectives and continually improve our environmental performance by:

- Implementing a management system that meets the requirements of ISO 14001:2015.
- Complying with all relevant legislative, regulatory and compliance obligations.
- Ensuring our activities are conducted in such a way as to cause minimum negative impact on the environment and prevent pollution.
- Minimising waste production and using registered carriers for disposal while continuing to seek more efficient recycling methods wherever practicable.
- Raising the awareness of environmental issues with all employees and working in partnership with customers and suppliers to promote environment issues where possible.

In order to achieve this, we will:

- Operate an environmental management system and adopt working practices that will minimise the negative effects and/or enhance the positive effects we have on the environment.
- Audit and review our environmental performance.
- Communicate to all employees in respect of our environmental policy and encourage contribution of every employee towards improving the environmental performance of the company.

This policy will be communicated to all personnel under the company's control to ensure they understand and fully implement the company's policies and objectives and are able to perform their duties effectively through ongoing training and development, and a review of resource needs. It will be available to all relevant interested parties upon request.

This environmental policy will be reviewed at least annually to ensure it remains appropriate to the strategic direction of the business.
